Professional Summary

Software Engineer and Full Stack Developer proficient in React.js, Node.js, Express.js, Laravel, PHP, MongoDB, and MySQL with experience building scalable web applications, REST APIs, and database-driven solutions. Strong foundation in object-oriented programming, problem solving, and modern software development.

Education

East Point College Of Engineering and Technology, Bachelor of Engineering (B.E.) — Information Science and Engineering

Sept 2020 – May 2024

- GPA: 7.5/10

Experience

Full Stack Developer Intern, Varcons Technology

Aug 2023 – Sep 2023

- Developed responsive web pages using HTML, CSS, JavaScript, and React.js.
- Assisted in debugging, testing, and deployment of web applications.
- Collaborated with developers to improve UI components and application performance.
- Worked with REST APIs and Git for version control during development.

Technical Skills

Languages: Java, Python, JavaScript, PHP, SQL, Go

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, Laravel, REST APIs

Databases: MongoDB, MySQL, SQLite

Tools: Git, GitHub, Postman, VS Code, Render

Concepts: OOP, API Integration, Database Design, Authentication, Responsive Web Design

Projects

AI-Powered Job Portal

Laravel | PHP | MySQL | Bootstrap | GitHub API

- Developed a full-stack recruitment platform with candidate and recruiter dashboards.
- Implemented resume parsing, GitHub profile integration, and automated skill scoring.
- Built job posting, application tracking, reviewer feedback, and hiring workflow modules.
- Designed responsive Bootstrap interfaces with MySQL database integration.

Foodies App

React.js | Node.js | SQLite

- Developed a full-stack meal management application with CRUD functionality.
- Built responsive React.js interfaces integrated with a Node.js backend.
- Designed REST APIs and SQLite database for efficient meal management.

Deep Learning Based Anomaly Detection for Fog-Assisted IoT Networks

Python | CNN | Pandas

- Developed a CNN-based anomaly detection model for Fog-assisted Internet of Vehicles (IoT).
- Applied data preprocessing and deep learning techniques to improve detection accuracy.

Certifications

React – The Complete Guide (Next.js & Redux)

Credential

The Ultimate MySQL Bootcamp

Credential

100 Days of Code: The Complete Python Pro Bootcamp

Credential
